

BREAKOUT

- At least 8 hours prior to baking, place dough balls in dough boxes, giving each space to proof. Cover securely and place in cooler.
- Dough can hold in cooler up to 72 hours.

PREP

- 30-60 minutes before use, pull boxes from cooler and allow to come to room temp.
- Dust with flour and gently stretch. Can use a press or stretch by hand to desired size on pan.

DECK OVEN

- Stretch to about 16" and dock.
- When pizza dough is ready, top with sauce, cheese and other desired toppings.
- Bake at approximately 550° for 8-10 minutes.

ROTATING OVEN

- Stretch to about 14" - 16".
- When pizza dough is ready, top with sauce, cheese and other desired toppings.
- Bake at approximately 500° for 8-10 minutes.

CONVEYOR OVEN

- Stretch to about 12" - 14".
- When pizza dough is ready, top with sauce, cheese and other desired toppings.
- Bake at approximately 450° for 10-12 minutes.

Please note: All coolers, sheeters and ovens will vary. Please make adjustments where necessary to bake to desired thickness and crispness.

ACHIEVE PERFECT RESULTS BY FOLLOWING THESE QUICK AND EASY DIRECTIONS

SIGA ESTAS INSTRUCCIONES RÁPIDAS Y FÁCILES PARA OBTENER RESULTADOS PERFECTOS

PREPARACIÓN

- Al menos 8 horas antes del horneado, prepare moldes limpios y forrados para descongelar la masa.

COLOCACIÓN EN MOLDE

- Coloque los bollos en un molde forrado con papel manteca.
- Use una cubierta de tipo rejilla para evitar que la masa se seque y se forme una capa dura.
- Coloque la rejilla en un refrigerador a 36° - 38° durante 24-48 horas.

TIEMPO AFUERA

- Dejar la masa de la pizza por un mínimo de una hora de tiempo a temperatura ambiente antes de procesar.
- Si la masa para la pizza se deja afuera por más tiempo será más fácil de estirar

PREPARAS LA MASA

- Haga la forma de la pizza utilizando un molde o una prensadora de pizza.
- Trabaje la masa a la medida deseada de ancho y grueso.
